SUMMARY

Experienced web developer with frontend and backend development expertise. Capable of developing scalable, secure, and user-friendly web applications and websites, as well as of solving complex problems, learning quickly, and adapting to new technologies. Switched to JavaScript in 2019 after 5+ years of PHP development experience, continuing to expand skill set.

WORK EXPERIENCE

Frontend JavaScript Engineer

Capgemini   04/2021 - Present   Remote
capgemini.com

- Develop and improve Chrome Extensions focused on data encryption/decryption and digital privacy.
- Implement new modules and support existing ones by refactoring, bug fixing, and creating unit tests, maintaining high levels of code quality and performance.
- Stack: JavaScript, React.js, HTML, SASS/SCSS, Git, Browser Extensions, Service Workers, Google API, Google Cloud Platform, Webpack.

JavaScript Developer

Avtor LLC   04/2020 - 04/2021   Kyiv, Ukraine (Remote)
avtor.ua

- Participated in the design and planning of web development projects.
- Built an internal frontend library with reusable React components.
- Created unique web applications from scratch using the latest JavaScript frameworks and technologies, including React.js, SASS/SCSS, Next.js, Node.js, Express.js, MySQL, Figma and Git/GitHub.
- Fixed bugs, refactored legacy code, implemented improvements to enhance projects efficiency.
- Mentored and guided junior developers, sharing expertise, and creating documentation for the code base.

Technical Reviewer, Web Developer

TemplateMonster   03/2017 - 03/2020   Mykolaiv, Ukraine
templatemonster.com

- Performed comprehensive design and code reviews for CMS, eCommerce, HTML, and Graphic templates, examined product information, verified documentation, and detected plagiarized templates.
- Trained new technical reviewers and created a handbook with best review practices, contributing to the knowledge base and promoting consistent review standards.
- Developed tools, parsers and code checkers using React.js, PHP, Node.js and MySQL.
- Created a Chrome Extension to expedite the review process.
- Designed and implemented a database management system for vendors.
- All of these tools greatly increased the department's efficiency, streamlined the review processes and automated manual tasks.

VOLUNTEERING

Web Developer and Project Creator

Mykolaiv School №46
12/2019 - 05/2020   Mykolaiv, Ukraine

- Developed a school web portal for remote learning during the pandemic.
- Designed and implemented a platform for teachers to manage class schedules, maintain blogs, and assign homework.
- Created a secure and user-friendly interface for students and parents to access information and resources.
- Utilized React.js, SASS/SCSS, Next.js, Node.js, Express.js, and MySQL to build a scalable and performant web application.
- To learn more about the project, please visit 46.com.ua.

EDUCATION

Bachelor degree in Computer engineering (Evaluated by WES Canada)

V.O. Sukhomlynsky National University of Mykolaiv
09/2012 - 06/2015   Mykolaiv, Ukraine

SKILLS

Key Skills

API Integration	Browser Extensions	CSS
DOM	Express.js	Figma	Git	Github
HTML	JavaScript	JSON	Next.js
Node.js	React.js	REST API	SASS
SCSS	TypeScript

Additional Skills

- Agile Methodologies
- Backend Development
- Code Review
- Content Management Systems (CMS)
- Databases
- Debugging
- Frontend Development
- GitHub Actions (GHA)
- Google API
- Google Cloud Platform (GCP)
- JQuery
- NPM
- MySQL
- PHP
- PostgreSQL
- React Native
- Redux
- Refactoring
- Search Engine Optimization (SEO)
- Service Workers
- Unit Tests
- User Interface/Experience (UI/UX)
- Vue.js
- Web Programming
- Web Security
- Webpack
- Website Building
- Website Maintenance
- Yarn
